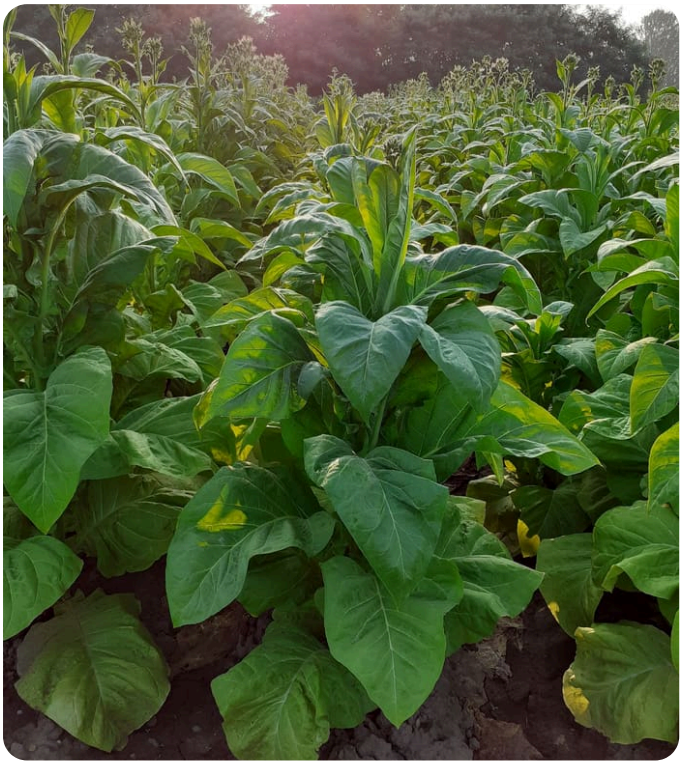
BSB 6184

VIRGINIA · FILLER TO SEMI-AROMATIC

BSB 6184 is a filler flue-cured hybrid with good stalk stand-up ability, an important trait for mechanical harvest. Yield and leaf quality potential are high. This variety will easily produce a uniformly coloured filler flue-cured with high sugar to nicotine ratio.



Chemical profile (UPLC and NIRS)

Nicotine **1,8 %**

0.5 – 2 % · 2 – 3.5 % · 3.5 – 6 % · > 6 %

Reducing sugars **17 %**

≤ 15 % · > 15 %

Values expressed as % of dry matter. These are averages from variety trials: BSB cannot guarantee that these levels will be reached under production conditions.

Pathogen resistance

R Resistant · T Tolerant · S Susceptible

R Black root rot *Thielaviopsis basicola*	R PVY *Potato Virus Y*
R TMV *Tobacco Mosaic Virus*	T Root-knot nematodes *Meloidogyne incognita races 1-3*
S Root-knot nematodes *Meloidogyne arenaria*	S Cyst nematodes *Globodera tabacum*
S Blue mould *Peronospora tabacina*	S Powdery mildew *Erysiphe cichoracearum*
S Broomrape *Phelipanche ramosa*	S Black shank *Phytophthora nicotianae race 0*

Characteristics & harvest

Type	Virginia
Recommended use	Filler to semi-aromatic
Earliness	Medium
Curing type	Flue-cured · Sun-cured
Quality index	79 / 100

Packaging & logistics

Available formats	Pelleted seed (1.60 – 1.80 mm or 1.75 – 2.00 mm pellets) · Raw seed
Pelleted seed · boxes	10,000 · 30,000 · 50,000 pellets
Pelleted seed · buckets	200,000 · 1,000,000 pellets
Raw seed	Heat-sealed aluminium foil sachets
